

Accelerators for Maximo Success

IN-NO-VA-TION

Innovation is the application of better solutions that meet new requirements, unarticulated needs, or existing market needs. This is accomplished through more effective implementation of products, services, and technologies, that are readily available to businesses and governments.

MAXIMO® ENTERPRISE ASSET MANAGEMENT

Takes the power, performance and possibilities of an enterprise asset management and work order system to an entirely new level. Built on a single software platform, Maximo Asset Management delivers a comprehensive view of all asset types — production, facilities, transportation and IT — across your enterprise. This holistic perspective allows you to see all of your assets, as well as identify all of the untapped potential within them. You gain the knowledge and control you need to closely align your organization's goals with the overall goals of your business.

Starboard Consulting, LLC
2170 West State Road 434, Suite 124
Longwood, FL 32279

Templates Offered by Starboard Help Expedite the Requirements Gathering and Design Phase:

Work and Asset Standards – Spreadsheets pre-seeded with asset classifications, nameplate data and attribution, failure classes, condition codes, meters, and other work and asset standards will be reviewed and given to the Core Team and subject matter experts to determine the enterprise standards for loading into Maximo.

Application and Mobility Configuration – Starboard offers library of mobile configurations for quick-to-implement solutions or for further tailoring as appropriate.

Reporting, KPI, and Business Intelligence – Starboard reviews the out-of-the-box reports, KPIs, and Business Intelligence metrics as well as those we've developed for other Maximo users in support of Reliability Centered Maintenance (RCM) and Asset Management (AM).

Interface Visioning Workshops – Starboard utilizes our decision making presentation templates and demonstration sandboxes to focus on the decisions to be made for each interface, as well as the options available, and our recommended approach based on our years of experience.

Data Migration Tools – Starboard provides tools that will assist in performing quality reviews, determining mismatches of data across the business unit silos, and mapping data from multiple sources into the new objects in Maximo in support of new enterprise system usage and business process standards.

The Fast Track to Success

Let Starboard put you on the fast track to success!

Starboard offers accelerators leveraging our years of experience

Implementing Maximo including:

- ◆ Ready-to-load templates with data for work and asset standards including criticality, risk (CoF and PoF), condition codes, asset classes, attribution, failure hierarchies, and meters.
- ◆ PM Templates, contract management, and labor management applications and processing for planned maintenance outages.
- ◆ Inspection and asset data uploads for contractors.
- ◆ Business analytics, reports, and performance metrics for cost, asset, and labor management.
- ◆ Joint use applications and processing for permitting and tracking of asset and invoice/payments including the ability to spatially manage assets and work.
- ◆ Mobile solutions utilizing Maximo and Maximo Everyplace including geo-enabled applications using Maximo Spatial.
- ◆ Pre-packaged designs, integration objects, and supporting processes for:
 - ◇ Spatial management of assets using Maximo Spatial, ESRI, and ArcFM.
 - ◇ Financial management and procurement processes with enterprise IT Systems.
 - ◇ Fixed asset management with enterprise IT Systems.
 - ◇ Condition and measurement point management with SCADA.
 - ◇ Design estimate and CUE work package creation with CAD/designer products.
 - ◇ Outage management with OMS/MDS solutions.
 - ◇ One call line locates management tracking and response.
 - ◇ Water and Wastewater event management such as SSO, Water Leaks, Smoke Testing, Site Restoration, Street Cuts, etc.
 - ◇ Water Monitoring/Water Quality functionality and business processes.
 - ◇ Operator Log and Rounds functionality.
