

Innovation Station

Fire Department Inventory Management

IN-NO-VA-TION

Innovation is the application of better solutions that meet new requirements, unarticulated needs, or existing market needs. This is accomplished through more effective implementation of products, services, and technologies, that are readily available to businesses and governments.

MAXIMO® ENTERPRISE ASSET MANAGEMENT

Takes the power, performance and possibilities of an enterprise asset management and work order system to an entirely new level. Built on a single software platform, Maximo Asset Management delivers a comprehensive view of all asset types — production, facilities, transportation and IT — across your enterprise. This holistic perspective allows you to see all of your assets, as well as identify all of the untapped potential within them. You gain the knowledge and control you need to closely align your organization's goals with the overall goals of your business.

- ❖ Provides a user-friendly and configurable interface suited to fire departments.
- ❖ Tracks and monitors capital equipment through its entire life cycle, from purchase to disposal.
- ❖ Customized training ensures user acceptance.

Fire fighters provide an essential public service. But in order for a community to remain safe, scarce resources must be managed in a cost effective manner. If they are not, the equipment relied on may fail at the most critical moments. Worse, that equipment could go missing or simply be dropped from the budget. When fighting fires, Maximo helps municipalities protect life and property by ensuring that crews have all the necessary equipment and supplies.

The inventory management capabilities within Maximo Asset Management can enable new levels of visibility into asset-related inventory, providing details on parts and materials, service items, and tools. Real-time inventory tracking and reporting can help streamline inventory management processes, helping to decrease costs by eliminating excess or obsolete inventory, and helping inventory managers optimize inventory planning.
