

Company Overview

Starboard Consulting is a Gold-accredited IBM Premier Business Partner and IBM Maximo reseller. Established in 2007 as a Maximo implementation consultancy, Starboard is recognized today throughout the Maximo community for our leadership and expertise, including our specialties in the areas of Spatial/GIS, Mobile, legacy system data migrations, and complex integrations.

- 15 years of implementing, upgrading, integrating, configuring, customizing, and supporting Maximo
- Experience working with all Maximo versions
- Longtime sponsors of Maximo Utility Working Group, Florida and Georgia Regional User Groups, and Airport Maximo User Group
- Extensive integration experience including GIS, Financial Information Systems, Customer Information Systems, Human Resources Systems, and more
- Experience across multiple industries, including utilities, ports, airports, water/wastewater, higher education, cities, municipalities, and more

Core Competencies

Starboard is a recognized leader in asset management, focused on delivering to the highest standards and expectations of our clients. Our main areas of expertise include:

- Maximo implementations, including mapping of business requirements to application feature sets
- Roadmap to MAS
- Maximo upgrades and add-ons
- GIS/spatial implementations for mobile and desktop use
- Mobility, including work and inventory management
- Integrations to enterprise business applications
- Data migrations, including validation and troubleshooting
- Managed Services support
- Configuration of applications and database attributes
- Application of best practices to Maximo for items including classifications, failure codes, and specifications
- Project expertise in areas of Organizational Change Management, Quality Assurance, Project Governance, and Risk Mitigation
- Training, including administrator and role-based user training
